EUVABECO consortium gathers in Bordeaux to advance deployment and evaluation

22 May 2025(<https://euvabeco.eu/2025/05/22/>)

---

*Bordeaux, France – 7-8 May 2024* – Partners from across Europe gathered in Bordeaux for a two-day workshop dedicated to advancing the EUVABECO project. The meeting provided an important opportunity for partner organizations to discuss recent progress and plan the next stages of implementing digital vaccination tools.

The workshop began with a warm welcome from local organizers and opening remarks by the EUVABECO project coordinator. A notable highlight was the introduction of a new consortium partner, the Instituto Superior Técnico (IST), the school of engineering and technology of the University of Lisbon. IST joins EUVABECO to strengthen the project's forecasting research through advanced machine learning methodologies. Afternoon sessions continued with discussions on project milestones, recent achievements, and targets for upcoming activities.

Day one concluded with an engaging keynote lecture by Sylvie Quelet, who shared valuable insights from France's successful HPV vaccination campaign in middle schools. Her presentation prompted enthusiastic discussions on how EUVABECO's innovative digital tools could support and enhance similar public health initiatives

across Europe.

On the second day, partners explored practical strategies for the implementation and evaluation of EUVABECO's tools, covering metrics for both short-term outcomes and long-term sustainability. The afternoon was dedicated to coordinating efforts and identifying essential resources to develop communication materials. These materials aim to help European Member States adopt and integrate EUVABECO's tools into their health systems.

The workshop concluded with clear next steps and plans for future meetings. Participants left Bordeaux united by a shared vision to guide EUVABECO successfully through its final phases – completing implementation, conducting thorough evaluations, and widely disseminating project outcomes.
